What is Forex

The foreign exchange market is a global decentralized or over-the-counter market for the trading of currencies. This market determines foreign exchange rates for every currency. It includes all aspects of buying, selling and exchanging currencies at current or determined prices. In terms of trading volume, it is by far the largest market in the world, followed by the credit market.

According to the Bank for International Settlements, the preliminary global results from the 2022 Triennial Central Bank Survey of Foreign Exchange and OTC Derivatives Markets Activity show that trading in foreign exchange markets averaged US$7.5 trillion per day in April 2022. This is up from US$6.6 trillion in April 2019. Measured by value, foreign exchange swaps were traded more than any other instrument in April 2022, at US$3.8 trillion per day, followed by spot trading at US$2.1 trillion.
